REASONS FOR ALLOWANCE

The claimed invention of a stabilized power supply is found to be allowable over the prior art since a stabilized power supply comprising a voltage control circuit generating a voltage control signal in response to the difference between a reference voltage and a feedback voltage associated with the stabilized power supply output voltage, an output circuit providing the output voltage from an input voltage in response to the voltage control signal, and a current limiting circuit generating a current limiting signal when the output current of the stabilized power supply exceeds a predetermined level that includes a slow response current limiting circuit generating a first current limiting signal and a fast response current limiting circuit generating a second current limiting signal wherein the current limiting signal consists of the first and second current limiting signals and controls the voltage control signal was not found to be singularly or collectively taught by the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably accompany the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
